

*Why Drs. Dutson, Long, and Spratt recommend the
OPTOMAP:*

1. The OPTOMAP allows us to see the variations in the eye's structure
2. Early detection can prevent vision loss or other complications
3. Gives us an in-depth view of the retinal layers (where disease can start)
4. Usually takes the place of eye dilation without any side effects of blurred vision or light sensitivity
5. Images can detect undiagnosed diseases in the eye and body such as macular degeneration, glaucoma, diabetes, and cancer
